Basic Force / Torque Indicator Model 3i

The 3i digital force / torque indicator is designed to work with a wide range of Mark-10 remote force and torque sensors (see page 3). With exclusive Plug & Test™ technology, all calibration and configuration data is saved within the sensor's smart connector, not the indicator, allowing for true interchangeability. In addition, all sensors are fully compatible with other Mark-10 indicators.

The 3i shares its menu structure and most specifications with Series 3 digital force gauges. The sampling rate is 2,000 Hz, producing accurate results under a wide range of test conditions. A backlit graphic LCD displays large characters, and a menu is available to access the gauges' features and configurable parameters. The display also features an analog load bar for graphical representation of applied load, as well as set point indicators for pass-fail testing. USB output is provided for data collection purposes.

The gauges include MESUR™ Lite data acquisition software. MESUR™ Lite tabulates continuous or single point data. One-click export to Excel allows for further data manipulation.

Features
- Interchangeable force and torque sensors through Plug & Test™ technology
- High-speed 2,000 Hz sampling rate
- USB data output of continuous or individual data points
- Ultra-compact size
- Large backlit graphic display
- Programmable set points with pass/fail indicators
- Live load bar graph with set point markers
- Peak readings and set points always displayed
- Configurable audio alarms and key tones
- 4 selectable units of measurement
- MESUR™ Lite data collection software included

Display Indicators
- Set points
- Pass/fail indicators
- Current reading
- Battery indicator
- Tension / compression indicator / Clockwise / counter-clockwise indicator
- Peak readings
- Measurement mode
- Units of measurement
- Analog load bar w/set point markers
Focus on Engineering: Plug & Test™ Technology

^ Unique Plug & Test™ technology allows for interchangeable sensors to be used with a Mark-10 model 7i, 5i, or 3i indicator. All calibration and configuration data is saved in the smart connector.

^ The Plug & Test™ connector locks into the receptacle in the indicator when fully inserted. Dual buttons on the indicator housing release the connector for easy removal. Gold plated spring contacts ensure long lasting and reliable connection.

Specifications

- **Accuracy:** ±0.2% of full scale + sensor
- **Sampling Rate:** 2,000 Hz
- **Power:** AC or rechargeable battery. Multi-step low battery indicator is displayed, gauge shuts off automatically when power is too low.
- **Battery life:**
  - Backlight on: up to 7 hours of continuous use
  - Backlight off: up to 24 hours of continuous use
- **USB Output:** Configurable to 115,200 baud.
- **Weight:** 0.7 lb [0.3 kg]
- **Environmental requirements:** 40 - 100°F, max. 96% humidity, non-condensating
- **Warranty:** 3 years (see individual statement for further details)

## Basic Force / Torque Indicator Model 3i

### In The Box

The 3i force / torque indicator is shipped as shown at left, and includes the following accessories:

1. Carrying case
2. USB cable
3. AC adapter
4. Resource CD (USB driver, MESUR™ Lite software, MESUR™gauge software demo, and user’s guide)
5. Certificate of calibration. If ordered with a sensor, a NIST-traceable certificate of calibration for the set (indicator + sensor) can be supplied upon request, at no additional charge.

Force and torque sensors are available separately.

The 3i force / torque indicator is shipped as shown at left, and includes the following accessories:

1. Carrying case
2. USB cable
3. AC adapter
4. Resource CD (USB driver, MESUR™ Lite software, MESUR™gauge software demo, and user’s guide)
5. Certificate of calibration. If ordered with a sensor, a NIST-traceable certificate of calibration for the set (indicator + sensor) can be supplied upon request, at no additional charge.

Force and torque sensors are available separately.
Models 7i, 5i, and 3i force / torque indicators are designed for use with Mark-10’s Plug & Test™ remote force and torque sensors. All calibration and configuration data is saved within the sensors’ smart connectors - not the indicator - allowing for true interchangeability. Each sensor series is available in a range of capacities, from 0.25 to 10,000 lbF (1 N to 50 kN) full scale and from 10 ozFin to 5,000 lbFin (7 Ncm to 550 Nm) full scale. Refer to individual sensor data sheets for further details.

- **Series R50**: Universal torque sensors, fixed chuck
- **Series R51**: Universal torque sensors, interchangeable attachments
- **Series R55**: Torque sensors
- **Series R01**: Tension / compression sensors
- **Series R03**: Inline tension / compression sensors
- **Series R02**: Compact compression sensors
- **Series R04**: Miniature tension / compression sensors
- **Series R05**: Ergonomics testing push / pull sensors
- **Series R52**: Static torque sensors
- **Series R53**: Closure torque sensors
