The lever operated TSA750 is ideal for quick-action testing of up to 750 lbF (3.75 kN) of tensile or compressive force. Made of rugged components, this test stand is durable enough for the factory floor, yet precise enough for laboratory environments. The loading lever can be positioned in 30° increments and the adjustable precision ground rack and pinion mechanism assures smooth, precise motion through 6 in. of travel.

The test stand includes adjustable travel stops and a frictional low force brake. It is available in vertical and horizontal orientations. Use this test stand with Mark-10 force gauges and gripping fixtures to create a complete push/pull testing system.

**Optional Equipment**

- **Digital travel display (TSA001)**: 6 in [150 mm] travel, 0.0005 in [0.01 mm] resolution, 0.001 in [0.03 mm] accuracy, SPC output for data collection.
- **Horizontal mounting kit (TSA002)**: Converts to horizontal orientation, for alternative mounting arrangements.
- **Mounting table kit (TSA003)**: Contains a mounting plate with matrix of threaded holes for grip and fixture mounting.

**In The Box**

The TSA750 and TSA750H test stands are shipped as shown above, and include the following accessories:

1. G1028 small hook
2. G1038 medium hook
3. G1035 large hook
4. G1042 extra large hook
5. G1009 compression plate, 2” dia.
6. #10-32 stud with jam nuts
7. Thumb screw for force gauges with 0.12 - 500 lbF capacities
8. Thumb screw for force gauges with 1,000 - 2,000 lbF capacities
9. Allen wrench set
10. Base (TSA750)
11. Additional column cap with hardware (TSA750H)
