REACH Statement

At Mark-10 Corporation, we recognize our obligations under the European Union's REACH Regulation (EC 1907/2006). We actively work with our supply chain to assess whether any substances of very high concern (SVHCs) are present in the articles we supply. Any substances found are at extremely small levels relative to regulatory thresholds and are therefore considered inconsequential. We aim to minimize the use of hazardous substances and collaborate with suppliers and internal teams to explore safer alternatives or design improvements.

As a manufacturer of force and torque measurement equipment, Mark-10 acts as a downstream user under REACH. We rely on upstream vendors to meet registration, authorization, or restriction requirements and maintain internal processes for screening raw materials and components. Our products are designed to meet or exceed applicable regulatory standards, and we continuously review our portfolio to ensure ongoing compliance while keeping trace substances to minimal levels.

A handwritten signature in black ink, appearing to read "Steve Mate".
